AB - J10000071 Antiobesity diet contains 30-60 wt.% soybean protein (as  
crude protein), 2-10 wt.% glyceride fats and oils, 27-60% carbohydrate  
in the dry solid, and vitamins and minerals.  
- Soybean protein preferably includes 30-80% hydrolysed soybean protein.  
- ADVANTAGE - The intake of the diet (1200kcal/day) decreases body fat  
and body weight, but supplies minerals, vitamins and essential fatty  
acids and maintains body protein.  
- (Dwg.0/0)
